

## Creating an inclusive environment for neurodiversity

You may have heard the word neurodiversity, but what exactly does that mean? Our recognition that our workforce is filled with minds that don't always think like we do is important in our more inclusive world. Neurodiversity is an umbrella term that refers to autism, dyslexia, ADHD, and other learning differences. Our content collection from NILE Micro Learning addresses neurodiversity and the importance of recognizing how different individuals' learning and communication style influences how they work best.
